

A close-up photograph of a light-colored ceramic cup filled with water. A stream of water is being poured into the cup from the top left, causing the water level to rise above the rim. The excess water is spilling over the right side of the cup, creating a small waterfall effect. The background is solid black, which makes the white and light-colored water and cup stand out. The text "...overflow" is written in a white, serif font in the upper right quadrant of the image.

*...overflow*
